## **DETAILED ACTION**

Claims 1-18 are pending in this application.

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-10,11-13, drawn to compression and decompression of data to recover data, classified in class 709, subclass 247.
- II. Claims 14-18, drawn to exchange control data to transfer among nodes or routes in a network, classified in class 709, subclass 242.

Inventions and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case invention II is drawn to method to exchange control data to transfer among nodes or route information in a network. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)

In accordance with 35 U.S.C 133, a shortened statutory period of one month(not less than 30 day) is hereby set forth to this Office Action. See also MPEP 710.02(b).

Application/Control Number: 10/007,420

Art Unit: 2151
